

Product: 4 Loop-black
Style: Casual; advanced

1. Take a four loop twister and make sure all of the loops are evenly distributed. Brush about a third of the hair at the crown and take the center of the Loopy Twister, and put it into your hair, as if it were a regular ponytail, temporarily ignoring the four loops. Then, pull and straighten the loops, so they are evenly distributed across the top of the ponytail.
2. Take the first section of hair on the top right and twist it and knot it, and pull it through the first loop, on the opposite side (bottom left loop) tightening the band around the hair until it is secure. Take the second section of hair from the top left side, twist it and gently knot it and pull across to the right side and pull it through the second loop (top right loop) tightening the band around the hair. Now, you have a loop at the top and one at the bottom. Take the third section of hair from the bottom (all of the hair) and pull it through the third loop (bottom loop) and once again, tightening the loop around the hair. This strand of hair is actually underneath the center and original ponytail. And finally, take the last section of hair that is left in the front, and pull it straight back, twist and make the final knot securing it through the fourth loop, that is left at the top and secure once again by tightening the band.
3. You could stop and be done or take a final step. If needed, loop the main ponytail one more time and then pull the hair half way back out of it to create the mini bun. Remember, you can always print out these directions and watch the how to video again, and then make notes for yourself. This style is more advanced so it takes watching the video a couple of times to get it!take the center of the Loopy Twister, and put it into your hair, as if it were a regular ponytail, temporarily ignoring the four loops. Then, pull and straighten the loops, so they are evenly distributed across the top of the ponytail.

To Remove:

Pull each small strand of hair straight out until hair is freed. Then pull middle out like you would a regular ponytail and straighten out Loopy Twister for next use.
