

Product: 5 Loop-black
Style: Beyonce Inspired Updo

1. Take all of your hair and brush into a ponytail at the crown of your head, taking the center of the Loopy Twister and put it into your hair ignoring the other five loops. Pull and straighten the loops, so they are distributed around the head evenly.
2. Fan your hair over the head, covering the loops and the twister. Then, you will divide the hair into five sections, taking the first section of hair at the top, pulling it through the top loop tightening the band around the hair loosely (this is so that if your sections aren't even, you will be able to borrow hair from the adjacent mini ponytail.) Take the second section of hair, on the right side, tightening the band (second one on the right) around the hair a securing a loose mini-ponytail. Then, take the bottom section of hair and secure it through the bottom loop creating another loose mini-ponytail. Follow to the lower left band securing the fourth section of hair into a loose ponytail. Take the last section of hair and secure through the top left band and make the last mini-ponytail. Now look at the mini-ponytails and make sure that they are all even. Switch out hair if you need to in order to make the mini-ponytails about the same size.
3. Start at the top and loop the band around until tight and secure the hair into a loop. Do this same motion around the rest of the head, making sure the bands are secure around the loops.
4. Pull and pick from the center of the loop until a bun starts to form in the middle. This might take a few seconds but really try to pull up, gently all around the center. Then gently spread the hair by pulling on the hair on the loops in the outside and then back again in the middle. Back and forth until you get the desired look. Take and twist part of the side bangs back around and tuck underneath as well as any other hair that needs to be tucked under. Touch up with styling spray and you are done.

To Remove:

Pull each small strand of hair straight out until hair is freed. Then pull middle out like you would a regular ponytail and straighten out Loopy Twister for next use.
