

Product: 4 Loop-black
Style: Bow Ponytail

1. Brush about 1/3 of the hair at the crown and take the center of the Loopy Twister and put it into your hair as a tight, high ponytail, temporarily ignoring the rest of the hair and the other four loops. Then, pull and straighten the loops, so they are evenly distributed around the ponytail.
2. Take the first section of hair on the left side, which is over the ear (leaving the bang section behind) and cross it over the center of the twister and down to the bottom right loop and pull it through tightening the band around the hair until it is secure. Take the second section of hair (same place but opposite side) from the right side, near the ear (leaving a front section of hair down) and pull it acrossed and over to the top left loop tightening the band around the hair.
3. Take the third section of hair from the right side (the bang hair) and pull it acrossed and under the ponytail and secure it into the third loop which is the bottom left.
4. Lastly, take the last section of hair (left bang) and pull it under the ponytail and secure it into the remaining loop on the right side. Make sure to smooth any bumps or flyaways. Please note that you can always temporarily clip up the top pony so you can see better before working on the last loop. Now you can stop now, or keep going.
5. You can pull out hair from each side to form a bow. Please see video.

To Remove:

Pull each small strand of hair straight out until hair is freed. Then pull middle out like you would a regular ponytail and straighten out Loopy Twister for next use.
